

Measuring your doorway

Our ramps are designed to last a lifetime, so it's important to take care when measuring your doorways. If the doorway opens out over the ramp, leave a 5 - 10mm clearance so the door doesn't jam when opening. Be sure to measure the heights at various points along the width of the door, as not all doorways are level. See the diagram below showing which measurements are needed.

Submitting a plan

The easiest way to have your custom design made, is to sketch a simple plan on paper showing the shape and design details you are after. Include as much info as possible regarding the heights and cut outs. If possible attach a photo of the door, along with the sketch plan to an email. A simple sketch as if viewing from the side is usually enough, so long as all dimensions are made clear.

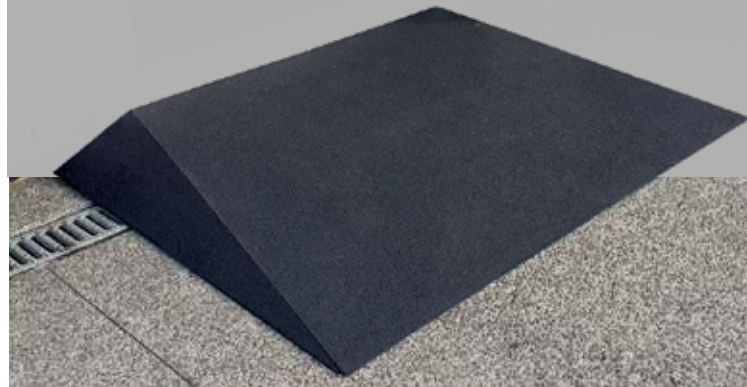

Custom Rubber Ramps

A unique range of custom designs are available, with unsurpassed quality of materials and finish, backed up by unrivalled service.

We can manufacture ramps to suit any shaped doorway, with the additional features of tapered edges, cut away sections, level platforms, kerbs and handrails.

Generally, the weight of the ramp will be enough to hold itself in position, however we can supply a bonding glue to fix the ramp in place permanently if required.

Rubber Threshold Ramps

Finally a versatile solution to all your ramping needs

Rubber Threshold Ramps

From Able Access

A simple ramp solution for every door, step or ranch slider transition. Manufactured in our specialised workshop in the Manawatu, we use New Zealand made recycled rubber to provide durable ramps, designed to last a lifetime. Our rubber ramps come in a convenient range of sizes to fit most applications. If you have a custom request for a ramp with angled sides, kerbs or cut out sections, we can make the perfect ramp to your specifications and have it delivered in as little as 3 - 4 days.

Our goal at Able Access is to make life a little easier for our customers. We strive to offer the highest level of quality in our products ensuring customer satisfaction. Please visit our website to see more examples of our products - www.ableaccess.co.nz

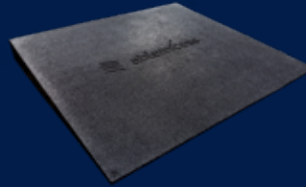

Ranch Slider Ramps

The Ranch slider ramps are made to fit against a sliding door threshold, wider than the standard threshold ramps at 1.2 metres. The ramps have a square base with tapered sides and are designed to fit up to the lower edge of the aluminium joinery. We can also custom make the ranch slider ramps to offer the smoothest transition possible for any sized doors, inside or out.

Convenient Size Range

All of our standard range products are made from New Zealand made recycled rubber material and are kept in stock, available for overnight delivery. We guarantee our products for 5 years and will replace the item if it becomes damaged from everyday use.

Height x Length x Width
CODE

Standard Threshold Ramps (Square sides)

15mm x 250 x 800 WEDG 1002	60mm x 350 x 800 WEDG 1014
20mm x 250 x 800 WEDG 1004	65mm x 600 x 800 WEDG 1016
30mm x 250 x 800 WEDG 1006	75mm x 350 x 800 WEDG 1018
40mm x 250 x 800 WEDG 1008	75mm x 750 x 800 WEDG 1020
50mm x 350 x 800 WEDG 1010	90mm x 900 x 900 WEDG 1024
50mm x 500 x 800 WEDG 1012	100mm x 900 x 900 WEDG 1026

Ranch Slider Ramps (Tapered sides)

25mm x 250 x 1200 RSR 1000	75mm x 600 x 1200 RSR 1004
50mm x 450 x 1200 RSR 1002	

Easy Access Ramps (Small and portable)

25mm x 150 x 200 EAR1002	75mm x 150 x 250 EAR1006
50mm x 150 x 250 EAR1004	100mm x 250 x 400 EAR1008

Quick Steps (Reduced step height)

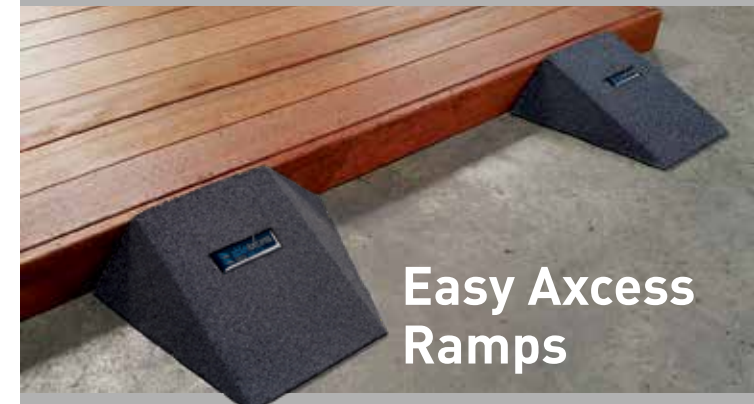

50mm x 450 x 800 AAQS50	100mm x 450 x 800 AAQS100
-----------------------------------	-------------------------------------

Quick Steps

The quick steps are designed to break up a single big step, into a series of consistent height smaller steps.

Steps can be purchased in two sizes, with tread heights of 50mm (2inch) or 100mm (4inch.). These are then added together to achieve the desired height.
